

How to clean fabric seats and carpets

Spray On

Damp Towel

Dry Towel

- 1 Vacuum the area to be cleaned
- 2 Take two towels and fold them in half twice to make a square. Wet one with fresh water and wring it out until it is only damp.
- 3 Spray the area to be cleaned with *cabin cleaner*
- 4 Rub the area with the damp towel, unfolding the square to expose clean sides, until the towel shows no signs of dirt.
- 5 Rub the area with the dry towel.
- 6 Allow time for fabric to dry.

NOTE:

- The damp towel method removes both the dirt and the soap. Using a damp towel cleans and rinses the fabric without forcing dirt and moisture deeper into the material, which can cause odors and corrosion.
