

How to Remove Bugs using the Bug Buster

- 1 Pre-soak the front of the vehicle with **Wash Wax ALL** (Blue)
- 2 Let the **Wash Wax ALL** soak for 10-15 minutes
- 3 Re-spray an area about 4 ft x 4ft with **Wash Wax ALL** (Blue) and scrub with the scrubber side of the **Bug Buster** (For extra scrubbing power, put the bug buster in the power edge position) then flip over to the Mop side of the **Bug Buster** and wipe off the majority of the bugs. It is not important at this stage that you get all the bugs and / or streaks off, you just want to break them up and get the bulk of them off, step 5 will complete the cleaning.

If your cleaning a large area like the front of an RV, we recommend you use the **Wash Wax Mop**. If you do not have **the Wash Wax Mop** or you are doing smaller areas like the leading edges of an aircraft put a microfiber pad on both sides of the bug buster to make it a Mini Mop.
- 4 Take two (2) clean, dry, mop pads. Take the "Wet Side Pad", wet it with fresh water and wring it out so it is only damp (not dripping wet)
- 5 Wipe each 4 ft x 4 ft area with the wet side, then flip the mop over and thoroughly dry the area. Do this until you have cleaned all the areas.

NOTE:

- The next time you remove bugs, it will be easier due to the non-stick coating left behind by the **Wash Wax ALL**.
- **Going over glass with a damp towel or pad (step 4 & 5) will remove any possible streaks left by the Wash Wax ALL. You will still have the water beading protection.**
- Keep in mind that you can put the **Bug Buster** in the power edge scrubbing position for hard to remove bugs
- For best results, avoid hot surfaces when removing bugs
- The wing nut on the **Bug Buster** can be adjusted to keep the Bug Buster from flipping too easily .
- **Wash Wax ALL** and the **Bug Buster** are safe to use on anti-chip coating found on the front of Motor homes, cars and aircraft (Diamond Shield).
- **The Bug Buster** can be used as a Mini Mop by placing a mop pad on both sides of the **Bug Buster**. This is excellent for getting into the tight spaces found on the RV.
